Certifications: Securing Your Competitive Edge

In today's digital landscape, cybersecurity certifications have become a crucial differentiator for businesses. Security Innovation helps you navigate the complex world of cybersecurity certifications and gain a competitive edge.

Preparing for Cybersecurity Certifications

Achieving the right cybersecurity certifications can demonstrate your commitment to security, build customer trust, and open new market opportunities. Security Innovation's team of experts can assist you in preparing for a wide range of certifications, including:

IEC 62443:

Establishing security capabilities and security levels for industrial control systems to protect against cyber threats that can disrupt critical infrastructure.

ISO/IEC 27001:

Implementing an information security management system (ISMS) to manage risks and protect the confidentiality, integrity, and availability of information assets.

US Cyber Trust Mark:

Ensuring your wireless consumer IoT devices meet the requirements of the FCC's voluntary program based on NIST IR 8425 guidelines.

NIST Cybersecurity Framework (CSF 2.0):

Aligning your security practices with industry-leading standards to assess and improve your cybersecurity posture.

Certification Audits and Issuance

Once your organization is prepared, another Bureau Veritas team can conduct the certification audits and issue the corresponding certifications. As a globally recognized leader in testing, inspection, and certification services, Bureau Veritas brings a wealth of expertise and accreditations to ensure your certifications are recognized and trusted.

About Security Innovation/ Bureau Veritas

Security Innovation is a leader in software security, providing comprehensive assessment solutions to secure software from design to deployment, across all environments, including web, cloud, IoT, and mobile. Leveraging decades of expertise and as part of Bureau Veritas, a global leader in Testing, Inspection, and Certification, we seamlessly integrate world-class security into development processes, safeguarding the way companies build and deliver products.

Security Innovation is a Bureau Veritas company. Bureau Veritas (BV) is a publicly listed company specialized in testing, inspection and certification. BV was founded in 1828, has over 80,000 employees and is active in 140 countries.

Unlock Your Competitive Advantage

By partnering with Security Innovation, a division of Bureau Veritas, you can demonstrate your commitment to cybersecurity, build customer confidence, and unlock new market opportunities. Contact us today to learn how our Certifications services can help you strengthen your security posture and gain a competitive edge.
